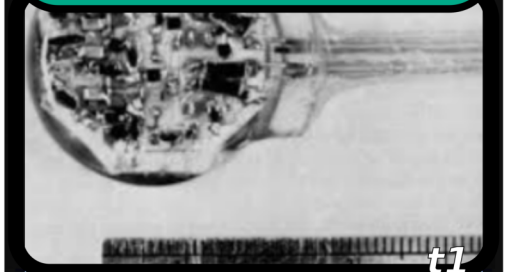
Stimoceiver



t1

Inventor: José Manuel Rodriguz Delgado **~1950**

The newest versions (see Neuralink, Elon Musk, HoneyPot) read data (like EEG) and transmitting signals to the brain. Can activeate certain functions in the brain, wires in the Amygdala would probably cause agressions (b1 card). You can find an active community (read only, and non-invasive) on Twitter: @OpenBCI maybe they try patch satans work. Things like directly "built-in" Augmented Reality (Like PokemonGO) could be achieved too with such technologies, see also Patent WO2005055579A1 (HoneyPot) or t12 Card. Can be used as lie detector (co2 card), read thoughts & emotions, influence emotions, automate & control victims (maybe with 3D GameEngine CryEngine / Unity, and possibly Google Maps 3D, OpenStreetMap?)

LoopRecorder Part 2

t23

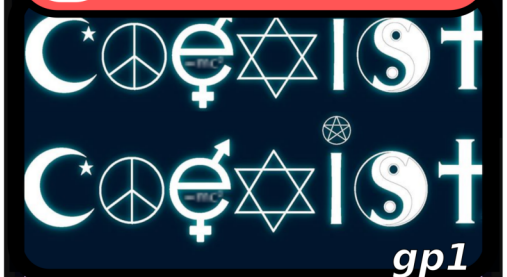
Inventor: xxxxx **Year:** ~????

There seems to be a digital looprecorder where people add good informations and after a while people begin to fill the loop with junk, problems, revictimizing of things they already did to the victim.

We are not sure why they are doing that, but it prevents the Whistleblower or WhiteHat Hacker to leak things or to fix bugs in software.

One possible reason could be, that people can eg. buy timeslots on Marc jrs Looprecorder for advertisement or for cyberterror. If you look at the Rawhammer Card of Mind (co2), this would drive people crazy (satan would insert m15 here to make you forget about the looprecorder) or more worse, they would begin to run amok or suicide. Possibly Quantim-Inserts, Turbine, Tarmiol are used for this but not yet sure about that. see Jacob Applebaums video "To Protect and Infect, Part2"

COEXIST



gp1

Inventor: comparative religion sciences

Evil Systems, or better some few people in big systems like the CIA and some older people tend to to separate society eg. left-wing from right-wing or christianity from islam from judaism, white from black, ... they try to make them fight each other while those who made them fight take their goods. Maybe we should warn the younger people with the message: **COEXIST.** As a christian for example learned a lot from Islamic or jewish culture. Notice for many people today science is also some sort of religion.

Those people who make profit out of wars would maybe want to distroy this card so that they can play on thier dirthy game. I please all religions to distribute and protect this sort of COEXIST cards.

Weed

c2

Inventor: God **Year:** -100k

Releases serotonin / dopamine, the unfiltered smoke is bad for the lungs, the arteries... It is currently an illegal self-medication. From medical point of view without consulting a doctor it is not the best idea to smoke weed. Because of the sedation the processing of consolidation of the things experienced in his live is skipped, which will lead later into a psychosis and reduces the resilience of the individual. Often used to obfuscate illegal human experiments for example t* cards. Can have a pain-relieving effect. Maybe helps against Epilepsy. Consumers show more ignorance that can help in some stress situations (but consider m49, m50 card). Additional the person that smkes weed seems to focus more on the non-verbal communication.

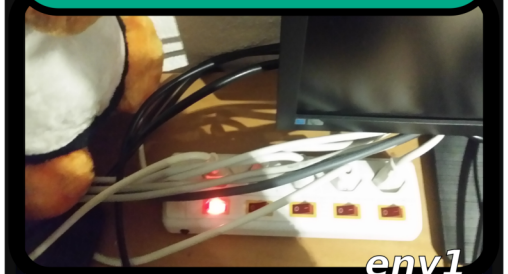
Save Energy



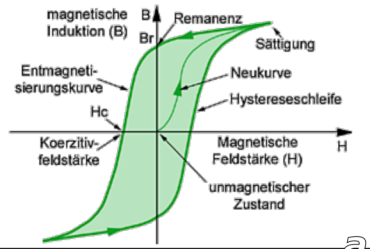
env1

Inventor: Greta? ♥ **Year:** ~2016

This is not yet implemented, but we should look at how much energy each person wastes, Car Driving, CO2 intensive Goods, Heating Temperature... The less one wastes the more timeslots and the less false informations and spam one gets on the mainframe-avatar. When my computer Room is not use it's switched of by a physical switch.

To Save The Planet. Thanks to Greta for telling us older people that we **MUST ACT NOW**.

HYSTERESIS REMANENCE



a2

Inventor: James Alfred Weing **Year:** ~1890

Describes the persistence of an effect after the causing force stopped. For example in (electro-)magnetism.

Old electron tupe televisions tend to become magnetized after a while which resulted in a bad picture, so they have had to be "degaussed".

The same principle maybe also works for psychological effects, see m15, t10, m19, co1, m9, t11 or **Clark Hull's Formula** for Emotions.

Black use Cases

For example to burn bad behavioral patterns into a Hacker to sue him and waste his time. Time that he could better use to defend jounger people from beeing owned by the CIA

public class Object

object ist die Schablone mit welcher alle anderen Schablonen hergestellt werden, bzw. sagt man "von der alle anderen **Klassen (Schablonen)** erben"

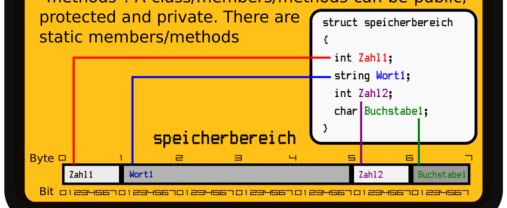
Inventor: Alan Kay **Year:** ~1993


Tell the computer to define an object, which is a element (a12) where the possible values are defined and and stored it in Memory (see also **struct** / C++) but there are also "functions" that are called "methods". A class/members/methods can be public, protected and private. There are static members/methods
