

## Suicide Death Bot

### infection path

m62

**Inventor:** xxxxx  
**Year:** ~????  
 They seem to play this card only if one have hardly no money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t1... they say that a suicide death bot was transferred to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround** i found was to **throw this food away**. I guess this is how they trigger poor people or homeless people. The victim of this cyber-attack would then maybe attack the person that transferred that malware (m50 Card). Often this sort of Malware spreads to your whole existence and to many of the scenes and objects you own. I heard they use same sort of malware eg. on **womans underpants**. We should transfer the malware back to the person who transferred it, but uneducated person would run amok.

## RAWHAMMER ATTACK

### OF THE MIND

 You could maybe also use some similar concept like rawhammer attack but on the mind (eg t1 card). Question an innocent victim if he / she wants to commit suicide, if you do this long enough this thought would be burnt into his / her mind and maybe then cause a real suicide attempt. Never play "red team" always play "blue team". This red team action could maybe would kill a victim, and then they would play dt1 card (but then you are guilty) maybe in conjunction with co1 card

### to delete the brain

 There are several (most non working) methods they try to format the brain of WhiteHats / Whistleblowers. c1, c2, a16, dt1, m22, m27, m41, m44, m45, m15, t10, co4, m42, but definitely m19. Maybe deleting the scenes of a rape would help the victim, maybe. Think of the drawing as a visual representation of the contents in your brain and the purple part is what they want to overwrite. Unfortunately brain is not two dimensional, so this would maybe work for a while but, and "anti"psychotics may "help" to keep the victim silent, but in the end nothing is really deleted. That's where the 1960s People have **great long-term job** opportunities for in the surveillance business played by the perpetrator, but after a while this "maybe" fails too... ## CARNIVORE

### (software)

co3

**Inventor:** FBI  
**Year:** ~1997  
 Things the public people was informed about and then "suddenly" **all people forgot about the thing**. So maybe those things are deleted while you are dreaming / sleeping (cards t1, t10, t12...) as a default process, everybody could maybe find out what they want to delete and focus more on that things.

Maybe it was intentional that IBM sold the Operating System Market to Microsoft. They could have made a lot of profit. When I started to question what is going on I tried to find the things that caused me Problems in the Operating System. But maybe the Operating system is just half of the Story

## UDSL-FREQUENCIES

**Inventor:** xxxxx  
**Year:** ~????  
 Like the professor said: "I'm glad you asked. No matter how full your life may seem, there's always room for some beer" -- that means, if the agencies are only 5 Years ahead of the consumer-market, they can easily hide unseen Transport Streams in the higher frequencies, here BINS (xDSL) but also in DVB-x or in Docsi (forget the beer, what did we just explain?)

playing unfair with world population that tries to find Satan on Layer 1 of the ISO-OSI Model, but maybe there are other channels, **see frequency table** and **who reserved / bought what frequencies...**

## UDSL-FREQUENCIES

**Inventor:** xxxxx  
**Year:** ~????  
 Electronics Book for Kids, Verlag: Stuttgart Frech, 1977. Warning, if the kid bought or recieved this book in the age of 10 it would be very likely that someone else wants to use him as scapegoat, and maybe the father of this kid is just the second scapegoat.

But it is my bad, that i spied on equal aged girls in scout camp, it worked but poorly
