

Hierarchy

a13

Inventor: Satan Year: ???

Hierarchical Systems tend to lack Moral. Most Companies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing punchingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15.... Maybe played with a14, which means that there will be also some bad left wing people.

The Sad thing is, that this is business as usual.

NORMAL-DISTRIBUTION

a1

Inventor: Carl Friedrich Gauss Year: ~1801

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "theraped" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe should really ask some questions. Personal Traits (eg. Mayer-Briggs) are norami-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is not evidence, but maybe something one should investigate.

DESIGN PATTERN

a7

Inventor: Christopher Alexander Year: ~1977

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to forced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Julian Assange talked about at HITB SecConf 2009 Malaysia...

Observer Pattern

a18

Inventor: Erich Gamma, Richard Helm ... Year: ~1994

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantuminserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "surveillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

EZAK IMAX

a14

Inventor: Satan Year: ~1950

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok <https://www.springer.com/us/book/9783764333384>

Same Algorithm can also be used in Psychology, Politics for example 95% Slaves in Companies and 5% small hitlers

Access Based Enumeration

Part 2

a18

Inventor: ??? Year: ~???
Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. If you would implement that on a client computer, you could do much more dirty tricks. For example if a Pedophilia Victim, a Torture Victim or a Victim that was Subject to illegal Human Experiments would find out who did that to him they would maybe want to keep the victim silent. So they would upload for example pedophilia images on the computer of the victim, call him a Terrorist for getting access to his computers, and would find the pedophilia content. If the Victim would look at the same folder on his Computer, the Access Based Enumeration algorithm would hide this images, so he would not know and the jury (m37 card) would judge the Victim of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...

ARTIFICIAL INTELLIGENCE

a11

Inventor: Isaac Asimov? Year: ~1960

Artificial Intelligenc, but also Propositional calculus or (German) Prädikatenlogik (= eg PROLOG) or learning algorithms, the so called singularity is maybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many years ago. Companies are Artificial Intelligences too, but mostly from the dark side of the force. If you want to learn it maybe begin with mini-max-algorithm and Tic-Tac-Toe
Controlly your touring complete Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

Access Based Enumeration

a5

Inventor: ??? Year: ~???
Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the m50 card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups. Maybe to explain Access Based Enumeration++ to the society would deescalate this problem a bit So update your people with this knowledge. I learned about Access Based Enumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side... if done in the graphics card or graphics driver one could manipulate things even if he checked if the file was transmitted correctly, so one need to print all evidence.
