

RETINA CCD

Inventor: **xxxxx** **Year:** **~????**
 Maybe "in the far future" we could be hypnotized by a QR-CODE since the Neuralink would dissociate one by a specific QR-code. Calling one insane or schizophrenic would maybe help to hide what they have done to him. But on the other hand he is also quite crazy. On the back of the ccd sensor you could even have a small LCD for triggering things. (Stimulus-Response-Habits). So if unsure about that, **CLOSE EYES WHEN TYPING PASSWORDS**. Even if a medic does such things in hospital and sterile environment, you could lose permanently eyesight. So maybe not the best idea. Workaround for hacked RetinaCCD would be to jam the frequencies used by the RetinaCCD

pituitary gland or hypophysis

Inventor: **God** **Year:** **B.C.**
 In vertebrate anatomy, the pituitary gland, or hypophysis, is an endocrine gland about the size of a pea and weighing 0.5 grams (0.018 oz) in humans. It is a protrusion off the bottom of the hypothalamus at the base of the brain.
 Hormones secreted from the pituitary gland help to control growth, blood pressure, energy management, all functions of the sex organs, thyroid glands and metabolism as well as some aspects of pregnancy, childbirth, breastfeeding, water/salt concentration at the kidneys, temperature regulation and pain relief.

INDUCED BURNOUT

Inventor: **xxxxx** **Year:** **~????**
 If a whitehat hacker discovers that the company he works in (for example in Switzerland) is maybe owned by NSA/CIA and would begin to tweet about that one would maybe ask, why the whistleblower was killed after tweeting that. So those people would attack him with different methods, eg. with declaring him Schizophrenic or with things like induced Occupational burnout. The chief maybe says stupid things like, "we only want to help marc" lets put him in mental institution that he gets better. but as we know already, a mental institution makes it much much more worse.
 To prevent that the remove whitehat hackers and whistleblowers or even kill them tell the people about this sort of NSA/CIA infiltration and terrorism.

WAIT TIME

Inventor: **xxxxx** **Year:** **~????**
 And if the kid / victim that was abused (abuse = obfuscation for human experiments) and transformed in a bot and he would be to fast for the people who did this to him / her they would send him to smoke a cigaret (Stimulus-Reaction-Habit or Electronic Harassment) so the can change things or fake the protocol or steal prove.

If one smokes, its possibly also a victim of such illegal human experiments. But it is also possible that one of the offenders smoke to obfuscate his role as culprit (a14 Card)
