

Military Rank

a3

Inventor: Satan / Romans? Year: ~500
 People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and began early to question things the older generation said. This way I went is possibly more painful since you must defend against the older generation and consider that the younger that help those older and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

F=TVS_r Equation for intelligence

a21

Inventor: Alex Wissner Gross Year: ~????
 In my opinion hierarchical systems are bad (a13) so there would be alternatives. For example the equation you see in the title. For example this algorithm would provide that no sheep gets lost (m68) if one would implement it in society, social systems, facebook, twitter...
 I studied Computer Science some years but for me it is too complicated to implement it.

Really great work, but maybe you could work on your Entertaining Skills and see a fashion consultant, but i've only seen this one video, maybe i'm wrong.

Language Level Detection (nasty filter rule)

a20

Inventor: xxxxx Year: ~????
 There are algorithms to find out about the language level of the person who wrote that text. For example if the text was written by a second grade student or by a language professor. It seems that satan took this algorithm and used it as filter algorithm that filters communication above a specific language level. For example for filtering communication over t1 or t12 card. This would have effect that especially intelligent people would be handicapped in "unseen university" (Terry Pratchett) while the less educated people would have no problems to communicate with each other. Unsure if bug or feature (preventing m40 card). But in a fair world all or none should have that filter. But it definitively wastes our time and makes us crazy and low self-esteem...

PATTERN RECOGNITION

a9

Inventor: Norman Joseph Woodland and Bernard Silver Year: ~1949

don't trust QR-Code Apps that much

Procastinate when 80% solved

a16

Inventor: xxxxx Year: ~????
 Algorithm on my "computer" when i try to do things to fix things to finish relevant business. There are problems like extending pam-usb with uidk2 where **unknown** starts an algorithm, that prevents me from solving the problem. The algorithm starts tons of new problems that are also relevant. I try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a suicide death bot (a16) against me. Prevents that problems are finally being solved. There are some sort of "resonators" (ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just other people that are being activated. If these are real people they are maybe being activated with Bigdata from the NSA / CIA Data Retention System that would prove earlier sins of this human(?) "BOIS". Mathematically spoken possibly / partially transitive. t1... transmuts now "this is non-solvable problem, hahaha" (= psychological warfare)

PSYCHOLOGICAL-PROFILE FROM EYE-MOUEMENT

a19

Inventor: xxxxx Year: ~????
 If you have something like google glasses, a retina-CCD Chip one could easily enumerate and footprint the psyche / the soul of the victim. if you would have at least 2 RFID chips on your head, or easier two LC-Cirquits on your head and a 3D model of the room, one could create such a profile.
 I make this card neutral, because it could be used for good and also for bad.
 Worst case they use such things to create at1 cards...

Bijektivitaet

Die Funktion $f: \mathbb{R} \rightarrow \mathbb{R}, x \mapsto x + a$ ist bijektiv mit der Umkehrfunktion $f^{-1}: \mathbb{R} \rightarrow \mathbb{R}, x \mapsto x - a$.

a15

Inventor: Good Year: ~???
 If you need to punish someone then do it bijective. Best thing is not to attack a person physically or in the mainframe, or with cyberwar... you could risk his or your life. There are seldom cases, for example if they want to (cyber-) [rape | attack] your girl..., in this case it is possibly ok to defend yourself and defend yourself without causing permanent harm. Maybe the offender is remote controlled. See cards t1... t*
 If there is something like death sentence for example in texas then and would kill an innocent you could find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences.

Hierarchy

a13

Inventor: Satan Year: ???
 Hierarchical Systems tend to lack Moral. Most Companies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing puntingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15... Maybe played with a14, which means that there will be also some bad left wing people.
 The Sad thing is, that this is business as usual.
