simplest way for digital communication over random frequencies. Expect that they have tons of such technolgoies. Never play Team, except you really really know what you possibly causes less harm then eg portscanning Worst case satan even abuses the lives of innoceni kids to protect its systems against hacking attacks. If you would kill a kid by a portscan then they Year: ~??? own you because then you are a murderer!!! AX.25 would be the nventor: xxxxx doing. Just Red

Inventor: Leo Esaki

A tunnel diode or Esaki diode is a type of semiconductor that is capable of very fast operation, quantum microwave frequencis. mechanical effect called tunneling. Operates

Oscilators. One could maybe integrate his also in CPU's or other electronic components. Like an Electrone Tube, to create High Frequencies /

Spatially, antenna forms can be distinguished by their radiation length in multiples or fractions of the Year: ~???? wavelength λ (Greek letter lambda): You can calculate the frequency of antennas. Maybe a golden wire in the body would have effects on nervous system or muscules. The only legitimate way to find out if this is true would be a selveexperiment and this would be risky and must be controlled by a doctor of medicine. People that with medicine or illegal drogs and they give kids abuse such technology would obfuscate their victims illegal drogs for making them fear the justice system and to cover up such illegal human experiments

openings to these cavities and cause radio waves to oscillate within, similar to the way a guitar resonates sound from its sound box via the oscillation of its interaction of a stream of electrons with a magnetic field while moving past a series of open metal cavities (cavity resonators). Electrons pass by the strings. see also t15 card that

Infrared,

detect light,

and it has synthetic sensor (calculated dy[n]/dt) those things will then matched to a matrix of learned events. So it can detect for example that you enabled the microwave oven (Electromagnetism &&unfortunately Satan can also detect if a inncoent girl uses her private epilator. If it is enabled and disabled Sound of the fan that cools down the Magnetron)

electrons from a hot filament or a cathode heated by

the filament. This type is called a thermionic tube or thermionic valve. Not all electronic circuit valves/

electron tubes are vacuum tubes (evacuated); gasfilled tubes are similar devices containing a gas

typically at low pressure

Vacuum tubes mostly rely on thermionic emission of

regions), is a device that controls electric current electrodes in an evacuated container.

bad things that happens in the world today. Psychological Profile of such a person would match If one would find the older people that bought eg. an guess. If i would be rich i would give all my money to IBM System 3850 in the early days of modern computing, we could maybe find out who did all this to rich people and therefor maybe also not the nicest people. But remember this would only be the first save the world, since there are still many problems on this world i bet i am not completely wrong with Year: ~??? Inventor: xxxxx my first guess. Could we find out who bought this sort of mass storage or other expensive² computer equipment in the old days??? unknown: IBM had a "maybe" a few
