Hierarchy — a13

Inventor: Satan **Year: ???**

Hierachical Systems tend to lack Moral. Most Companies have hierarchical structure often they abuse small left wing people in the lowest rank to make the customers think that the company and its management is good and trustworthy. In case such a left wing puncingball would upgrade to a Whistleblower and find out about the dark management and that they abuse the young people as such punching balls they would possibly attack him with a16, m38, t15.... Maybe played with a14, which means that there will be also some bad left wing people.

The Sad thing is, that this is business as usual.

DESIGN PATTERN — a7

C	Abstract Factory	S	Facade
S	Adapter	C	Factory Method
S	Bridge	S	Flyweight
C	Builder	B	Interpreter
B	Chain of Responsibility	B	Iterator
B	Command	B	Mediator
S	Composite	B	Memento
S	Decorator	S	Prototype
S	Proxy		
B	Observer		
C	Singleton		
B	State		
B	Strategy		
B	Template Method		
B	Visitor		

Inventor: Christopher Alexander Year: ~1977

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to foced her own daughter after they attract me with a computer course and then they used this permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Juilan Assange talked about at HITB SecConf 2009 Malaysia...

Bijektivitaet — a15

Die Funktion $f \colon \mathbb{R} \to \mathbb{R}, x \mapsto x + a$ ist bijektiv mit der Umkehrfunktion $f^{-1} \colon \mathbb{R} \to \mathbb{R}, x \mapsto x - a$.

Inventor: Good **Year: ???**

If you need to punish someone then do it bijective. Best thing is not to attack a person physically or in the mainframe, or with cyberwar... you could risk his or your life. There are seldom cases, for example if they want to (cyber-) [rape | attack] your girl..., in this case it is possibly ok to defend yourself and younger against the offender. Keep in mind that you defend yourself without causing permenent harm. Maybe the offender is remote controlled. See cards t1....t*

If there is something like death sentence for example in texas then and would kill an innocent you would find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences.

EZAK IMAK / Hun in the Sun — a14

Dieses Spiel besitzt offensichtlich keinen Sattelpunkt (warum?). Weder Jäger noch Bomber haben reine Strategien, die sich nicht durch den Gegner zu dessen Vorteil ausnützen lassen, wenn dieser die Strategie im voraus erfährt. Beide Parteien

	Bomber	
	Nach oben	Nach unten
Hun-in-the-Sun	0,95	1
Jäger Ezak-Imak	1	0

Inventor: Satan **Year: ~1950**

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algotithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok https:// www.springer.com/us/book/9783764353384

Same Algorithm can also be used in Psychology, Politics ..., for example 95% Slaves in Companies and 5% small hitlers

---

PSYCHOLOGICAL-PROFILE FROM EYE-MOVEMENT — a19

Inventor: xxxxx **Year: ~???**

If you have something like google glasses, a retina-CCD-Chip one could easy enumerate and footprint the psyche / the soul of the victim. if you would have at least 2 RFID chips on your head, or easier two LC-Cirquits on your head and a 3D model of the room, one could create such a profile.

I make this card neutral, because it could be used for good and also for bad.

Worst case they use such things to create at1 cards...

Observer Pattern — a8

Inventor: Erich Gamma, Richard Helm ... Year: ~1994

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantumInserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "surveillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

---

Procastrinate when 80% solved — a16

Inventor: xxxx **Year: ~???**

Algorithm on my "computer" when i try to do things, to fix things, to finish relevant business. There are problems like extending pam-usb with udisk2 where unknown starts an algorithm, that pervents me from solving the problem. The algorithm starts tons of new problems that are also relevant, I try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a a suicide death bot (a16) against me. Prevents that problems are finally beeing solved. There are some sort of "resonators" (Ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just other people that are beeing activated. If these are real people that are being activated with BigData from the NSA / CIA Data Retention System that would prove earlier sins of this human(?) "BOTS". Mathematically spoken possibly / partitially transitive. t1... transmuts now "this is non-solvable problem, hahaha" (= psychological warfare)

NORMAL-DISTRIBUTION — a1

Inventor: Carl Friedrich Gauss Year: ~1801

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "therapied" by mental institutions and then they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe sould really ask some questions. Personal Traits (eg. Mayer-Briggs) are noraml-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is not evidence, but maybe something one should investigate.
