forced marriage Operating System
mos5 mental operating system

Inventor: ???? **Year: ????**

Some military people their power to force a woman into mariage. Weapons are not only Guns or Tanks, also having access to eg. Financial Systems, or a doctors degree, or a psychiatris degree destroy the live or hunt down eg the brother of the women he wants to rape. In Switzerland it is now public, that the parmacy industry did drug experiments with Verdingkinder (Children without Parents) So far not public known is that they also tested things like Stimoceiver or Neuralink. Today all people in Switzerland seem to have such Interfaces. Therefor there must be a backbone and we guess that this would be the Military Fiber Backbone. When i asked the Schulkommandant of Waffenplatz Wangen: "What is the military fiber backbone for" (i was not sure that there is one, social engeneering) he said only "for marching orders only"... **Some Militaries intentionally let their soldiers force woman into mariage, if they do this with secret technology** the military can easily force them to **defend this secret**, otherwise her women could prove that she was forced to marry the soldier, so they let the soldiers intentionally abuse it.

Stanford prison "experiment"
**m50 — antagonizing situation / medication**

Inventor: ???? **Year: ????**

One can produce situations, where people are played off against each other. You could do this with drugs, for example giving one person chemicals that make happy and funny and the other person chemicals that make sad. Wirst case both victims will begin to fight each other while both victims think that he or she does the right thing. Maybe such chemicals were involved in Stanford prison experiment, unsure. But with Technology cards (eg. t1...) you could possibly produce similar situations. Or in Politics, race, gender... or even just with showing good or bad Facebook content (facebook experimetn, see Internet). **NOTICE THE UNSEEN THIRD. For example also to tell some people that the accused younger boy is guilty and therefor it would be "legitimite" that an older person takes his goods would create the same situation, the unjust decision os often in favour of the stronger like Urs B. that has weapons... NOTICE UNSEEN THIRD.**

Security Software and exploitation
m89 $f^{-1}(x)$

Inventor: xxxxx **Year: ~????**

On the mainframe there are many software modules that warn people from risking their lives or their health. Unfortunately some people wrote a generic algorithm, that rewrites things like "don't touch here" to "touch it now, touch it fast" or "stop here" to "continue fast". So people would get hurt by the security software that should prevent that they get hurt. The same thin like someone would stick a "good medicine" sticker over a biohazard sticker. We should add additional algorithms that prevent such modifications. Possibly it is also just a second system that evaluates the "WARNING" message and then takes over the Human-BOTs, Stimoceiver, Neuralink ... after one found such a malware they often sell it as feature to train students, not considering what such a malware could cause harm or even kill innocent kids

---

big systemchanges in little time
**m88** $\frac{dy}{dt}$ time (t)

Inventor: xxxxx **Year: ~????**

Big System-Changes in little time seem to cause problems. For example if you would have mos2 / mos3 malware cards installed on the whole and one would just leak the whole blueprints how this system works, to stop it, it would drive the criminals run amok or suicide. So do such changes slowly [dy/dt]. The area below the curve (Integral ∫) would still be the same, but the chance that people guilty people run amok or even kill their victims that they can not do a testemony is smaller. The criminals use it exactly the opposit way for targeting whistleblowers, whitehat hackers, victims... they for example link you with your equal aged allies on the com-system (eg. t1) where you have fun and are lucky that you are not alone, gives you full communication with and the suddenly drop the connection, they recorded what you talked about, "plays the scenes in reverse", especially that what helped you stable and feel good (m77 card) and then start a virtual simulation (multiple t21 cards) that destroys all these good scenes (m57 card checks that) and then loop the bad things (t10, t23 t32, m54) and start (co6,a16, at1...)
