## NORMAL-DISTRIBUTION — a1

Inventor: Carl Friedrich Gauss Year: ~1801

E.g. the distribution of intelligence in society is normal-distributed. If you would find out that people that run amok or suicide quite often after they have been "therapied" by mental institutions and that they are shut away maybe in the same mental institution after they run amok more than the normal-distribution would predict, then you maybe sould really ask some questions. Personal Traits (eg. Mayer-Briggs) are noraml-distributed too. So these formulas are quite useful to find out if one tells the truth or not. But it is not evidence, but maybe something one should investigate.

Observer Pattern — a8

Inventor: Erich Gamma, Richard Helm ... Year: ~1994

The observer pattern (also called listener pattern) is a design pattern in software development. It belongs to the category of behavior patterns. In the programming language Java it would need an interface (public interface Observer) and it would be used with "implements Observer" (needs exercise and maybe qfire, quantumInserts, Turbine, Tarmoil tries to make it hard for you to learn) It does not mean "survaillance" its a computer science Term, but of course such a design pattern can also be abused for surveillance, and eg trigger a16 Card.

To use Design Patterns you first need to learn an OOP Programming Language

---

Access Based Enumeration — a5

Inventor: ???   Year: ~???

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. The same principle maybe applies to websites, youtube, maybe even gitub... if you look at the **m50** card the same system "could" be used to split society into two+ separate groups, and there would be even some triggers known to some of the older groups to start a civil war between this two groups.
Maybe to explain **Access Based Enumeration++** to the society would deescalate this problem a bit. So update your people with this knowledge. I learned about Access Based Ennumeration at ABB Technikerschule Baden, hopefully the teach this function not for the dark-side...

DESIGN PATTERN — a7

C Abstract Factory	S Facade	S Proxy	
S Adapter	C Factory Method	B Observer	
S Bridge	S Flyweight	C Singleton	
C Builder	B Interpreter	B State	
B Chain of Responsibility	B Iterator	B Strategy	
B Command	B Mediator	B Template Method	
S Composite	B Memento	B Visitor	
C Decorator	C Prototype		

Inventor: Christopher Alexander Year: ~1977

Design Patterns are well known in Software Development, but can be applied also in Sociology, Psychology, Architecture, Electronics (for example an Operational Amplifier or op-amp is some sort of design pattern too)

For example the Jus Primae Noctis Card (some sort of psycholog design pattern) some assholes use to forced her own daugther after they attract are with a permanently changing design pattern over a period of 20 years to snipe me away from the things i was doing in this moment. That is the prove that there are "white"-torture design patterns Juilan Assange talked about at HITB SecConf 2009 Malaysia...

## EZAK IMAK Hun in the Sun — a14

Inventor: Satan   Year: ~1950

Ezak Imak (Kami Kaze in reverse) VS Hun in the Sun The Japanese Attacked the US Airforce most from bottom up 95% but sometimes from the top to bottom 5%, so the US Airforce had to watch both sides. Today mental institutions use the same algorithm for psychological warfare. 95% Patients are Victims, 5% are forced to run amok https://www.springer.com/us/book/9783764353384

Same Algorithm can also be used in Psychology, Politics .... for example 95% Slaves in Companies and 5% small hitlers

---

ARTIFICIAL INTELLIGENCE — a11

0 (max)
1 (min)
2 (max)
3 (min)
4 (max)

Inventor: Isaac Asimov?   Year: ~1960

Artificial Intelligenc, but also Propositional calculus or (German) Prädikatenlogik (= eg PROLOG) or learning algorithms, the so called singularity is meaybe already here, which would explain why I wept when in the end of the Movie "Artificial Intelligence" finally sees his "Mother" again. But this should not be his mother, but his equal aged mental mother that showed him the women side of the world so many yearss ago. Companies are Artificial Intelligencies too, but mostly from the dark side of the force. If you want to learn it maybe begin with mini-max-algorithm and Tic-Tac-Toe

Controly your **touring complete** Avatar and say something if he/she/it suggests wrong things like violence, murderer, amok...

Suicide Death BOT — a16

Inventor: xxxx   Year: ~???

If a person can be controlled or at least influenced by some technology cards t* evil people unfortunately could create some sort of a suicide death bot, using things like m38 card for priming to make innocent people to comit suicide (attempts). We think that this is the major way eg. CIA kills people that know to much and the reason news are normally not telling the story from people that commited suicide (maybe they killed ian Murdock with a suicide death bot). People with lower rank would be lost too and the whole group would be lost too and so controllable by eg. the CIA. wirst case m37 && dt1 card. Those groups that already have "trained" a kid to death would never confess. Forced to keep silent. Possibly the code of such suicide death bots would be packed into proprietary non-deterministic crypto both personalized or generic. eg. m38 would be generic. Was Ian Murdoch@Debian also a victim?

Access Based Enumeration Part 2 — a18

Access-based Enumeration induced files or folders that the user has invisible on the all cased Access-based Enum would complicated Windows will not display files become its Morey text have rights to access technolo 0 much whole text with access F44.0 much more text ICD-10 become the text but read enumeration on this shared folder
Inventor: ???   Year: ~???

Depending on the authorization (or the security clearance) of a user, folders are shown or not shown in a Windows Network. If you would implement that on a client computer, you could do much more dirthy tricks. For example if a Pedophilia Victim, a Torture Victim or a Victim that was Subject to illegal Human Experiments would find out who did that all to him they would maybe want to keep the victim silent. So they would upload for example pedophilia Images on the computer of the victim, call him a Terrorist for getting access to his computers, and would find the pedophilia content. If the Victim would look at the same Folder on his Computer, the Access Based Ennumeration algorithm would hide this images, so he would not know and the jury (m37 card) would judge the Victim of Pedophilia when he was 10 years old, the would help to hide the illegal human experiments ...
