a20 — Language Level Detection (nasty filter rule)

Ihre Antwort ist bedeutungslos. Wir wissen nichts. Wir registrieren, berechnen und ziehen unsere Schlussfolgerungen.

Year: ~????

Inventor: xxxxx

There are algorithms to find out about the language level of the person who wrote that text. For example if the text was written by a second grade student or by a language professor. It seems that satan took this algorithm and used it as filter algorithm that filters communication above a specific language level. For example for filtering communication over t1 or t12 card. This would have effect that especially intelligent people would be handicaped in "unseen university" (Terry Pratchett) while the less educated people would have no problems to communicate with each other. Unsure if bug or feature (preventing m40 card). But in a fair world all or none should have that filter. But it definitively wastes our time and makes us crazy and low self-esteem...

---

a21 — F=T∇S_T — Equation for intelligence

$$F = T\nabla S_T$$

Year: ~????

Inventor: Alex Wissner Gross

In my opinion hierarchical systems are bad (a13) so there would be alternatives, for example the equation you see in the title. For example this algorithm would provide that no sheep gets lost (m68) if one would implement it in society, social systems, facebook, twitter...

I studied Computer Science some years but for me it is to complicated to implement it.

alex_wissner_gross_a_new_equation_for_intelligence
Really great work, but maybe you sould work on your Entertaining Skills and see a fashion consultant, but i've only seen this one video, maybe I'm wrong.

a3 — Military Rank

36 33 50

Oberst
Fach-offizier (Fachof)

Year: ~-500

Inventor: Satan / Romans?

People tend to subjugate other people and making them "usable" for their own profit. Globally there are many of such systems that use things like dt1 card to enslave people people. Right-Wing people seem to thrive in Military Systems. Maybe not even by their own will but they have had maybe dominant parents and learned that it is liked with less pain if they just do what the older person says. I myself was always rebel and begun early to question things the older generation said. This way I went is possibly more painful since you must deffend against the older generation and consider that the younger that help those olders and obey their order attack you from two sides. And it would not be fair to be mean to the younger.

---

a6 — OOP CLASS

Year: ~1993

Inventor: Alan Kay

The inventor of the programming language Smalltalk was the first who used objects in software development. It was maybe the first Programming Language that used "**Object Oriented Programming**". Like Gutenberg could print complete books with letters templates one can create bigger things out of such objects. A Class is can be single part of a complete software product. Eg. in an addressbook Class you would have predefined filedes for Name, Address, Phone Number...". You can also have such templates in Psychology, Mechanic. Simplification / standardisation through predefined templates makes things more efficient but people maybe loose base skills when using JUST templates
---

a15 — Bijektivitaet

Die Funktion $f: \mathbb{R} \to \mathbb{R}, x \mapsto x + a$ ist bijektiv mit der Umkehrfunktion $f^{-1}: \mathbb{R} \to \mathbb{R}, x \mapsto x - a$.

Year: ???

Inventor: Good

If you need to punish someone then do it bijective. Best thing is not to attack a person physically or in the mainframe, or with cyberwar... you could risk his or your life. There are seldom cases, for example if they want to (cyber-) [rape | attack] your girl... in this case it is possibly ok to defend yourself and younger against the offender. Keep in mind that you defend yourself without causing permanent harm. Maybe the offender is remote controlled. See cards t1....t*

If there is something like death sentence for example in texas then and would kill an innocent you would find that out to late, then the whole state could sentenced to death to. In Switzerland there are no official death sentences.

---

a19 — PSYCHOLOGICAL-PROFILE FROM EYE-MOVEMENT

Year: ~????

Inventor: xxxxx

If you have something like google glasses, a retina-CCD Chip one could easy enumerate and footprint the psyche / the soul of the victim. if you would have at least 2 RFID chips on your head, or easier two LC-Cirquits on your head and a 3D model of the room, one could create such a profile.

I make this card neutral, because it could be used for good and also for bad.

Worst case they use such things to create at1 cards...

---

a16 — Procastrinate when 80% solved

Year: ~????
Inventor: xxxx

Algorithm on my "computer" when i try to do things, to fix things, to finish relevant business. There are problems like extending pam-usb with udisk2 where unknown starts an algorithm, that pervents me from solving the problem. The algorithm starts tons of new problems that are also relevant, I try to solve them all but always when i solved 80% of a tasks, the next problem opens or even starts a a suicide death bot (a16) against me, Prevents that problems are finally beeing solved. There are some sort of "resonators" (Ingress), that prevent the whitehat hacker / whistleblower from solving it. Resonators maybe just other people that are beeing activated. If these are real people they are maybe beeing activated with BigData from the NSA / CIA Data Retention System that would prove earlier sins of this human(?) "BOTs". Mathematically spoken possibly / partitilly transitive. t1... transmuts now "this is non-solvable problem, hahaha" *(= psychological warfare)
