co5 — how they >try< to delete the brain

Year: ~????
Inventor: xxxxx

There are several (most non working) methods they try to format the brain of WhiteHats / Whistleblowers. c1, c2, a16, dt1, m22, m27, m41, m44, ma5, m15, t10, co4, m42, but definitely m19. Maybe deleting the scenes of a rape would help the victim, maybe.
Think of the drawing as a visual representation of the contents in your brain and the purple part is what they want to overwrite. Unfortunately brain is not two dimensional, so this would maybe work for a while but, and "anti"psychotics may "help" to keep the victim silent, but in the end nothing is really deleted. That's where the 1960s People have great long-term job opportunities for in the surveillance business payed by the perpetrator, but after a while this "maybe" fails too... https://marclandolt.ch/ml buzzernet/2015/08/15/visuelle-repressentation-einer-seelegeistespsyche/

co2 — RAWHAMMER ATTACK OF THE MIND

Year: ~???
Inventor: xxx

You could maybe also use some similar concept like rawhammer attack but on the mind (eg t1 card). Question an innocent victim if he / she wants to commit suicide, if you do this long enough this thought would be burnt into his / her mind and maybe then cause a real suicide attempt. Never play "red team" always play "blue team". This red team action could maybe would kill a victim, and then they would play dt1 card (but then you are guilty)

maybe in conjunction with co1 card

m62 — Suicide Death Bot infection path

Year: ~????
Inventor: xxxxx

They seem to play this card only if one have hardly no money or spent last money to red cross for water in syria. One buys food with last money, and then they activate a old ugly Bot (m48 Card) that eg. touches food, on t1... they say that a suicide death bot was transferd to your last food. The bad thing is, if you then would eat this food this m44 would be activated. The only **workaround i found was to throw this food away**. I guess this is how they trigger poor people or homeless people. The victim of this cyber-attack would then maybe attack the person that transfered that malware (m50 Card). Often this sort of Malware spreads to your whole existence and to many of the scenes and objects you own. I heard they use same sort of malware eg. on **womans underpants.** We should transfer the malware back to the person who transfered it, but uneducated person would run amok.

co1 — STATE DIAGRAM STATE MACHINE

Year: ~???
Inventor: xxx

https://en.wikipedia.org/wiki/UML_state_machine

If you have a production line (that can be abused to programm stimulus-reaction-habits), the line can have several different states, so you have to define the states and how / when (eg. eventtrigger) they change, see eg. Siemens S7 PCL
The same principle is unfortunately also abused aganist humans or even children:
1. *Normal*: loop { you will be raped } =>
2. *kidappst*: someone says "Fu** your Mother'" =>
3. *Rage*

Induced with eg t1 or t* card

cpu1 — INTEL Management Engine

Year: ~????
Inventor: xxxx

Hardware Backdoor... / Firmware Backdoor: See: https://media.ccc.de/v/32c3-7352-towards_reasonably_trustworthy_x86_laptops

Maybe it was intentional that IBM sold the Operating System Market to Microsoft. They could have made a lot of profit. When I started to question what is going on I tried to find the things that caused me Problems in the Operating System. But maybe the Operatingsystem is just halfe of the Story

https://0x8.ch/HackersCardgame3

co3 — CARNIVORE (software)

~1997
Inventor: FBI

Things the public people was informed about and then "suddenly" all people forgot about the thing. So maybe those things are deleted while you are dreaming / sleeping (cards t1, t10, t12....) as a default process for all people globally? If it would be a default process, everybody could maybe find out what they want to delete and focus more on that things.

https://en.wikipedia.org/wiki/Carnivore_(software)

co12 — Behavioral Science stealth mode CAM

Year: ~????
Inventor: xxxxx

If you would add a device to a webcam that can cause lot of PAIN, for example with sound above 120dB or with an implant or an Active Denial System that causes all nociceptors to fire at the same time? Maybe one would not see the cam after a while. This would be some sort of Skinner Box or classical conditioning (t2, t11) and maybe cards t10, t14, t15, t32, t33, m38, m26, endo1, e1, e2, e3, e4. Involved. The cam would become invisible for the poor mouse. Even specific images shown on computer. So this would maybe the real reason why Pinky & Brain never wins. If you feel PAIN since 17 years one could begin to ignore that there are invisible things. But in my case (i guess i'm a bit Autistic) this would be an invitation to hack this of technology. And since I would be the mouse it would be a selfe-experiment and therefor to try to hack this that would be a legitime move. Not prooven YET.
